

LANDER FREE MEDICAL CLINIC

ANNUAL REPORT

2024

CARING FOR FREMONT COUNTY

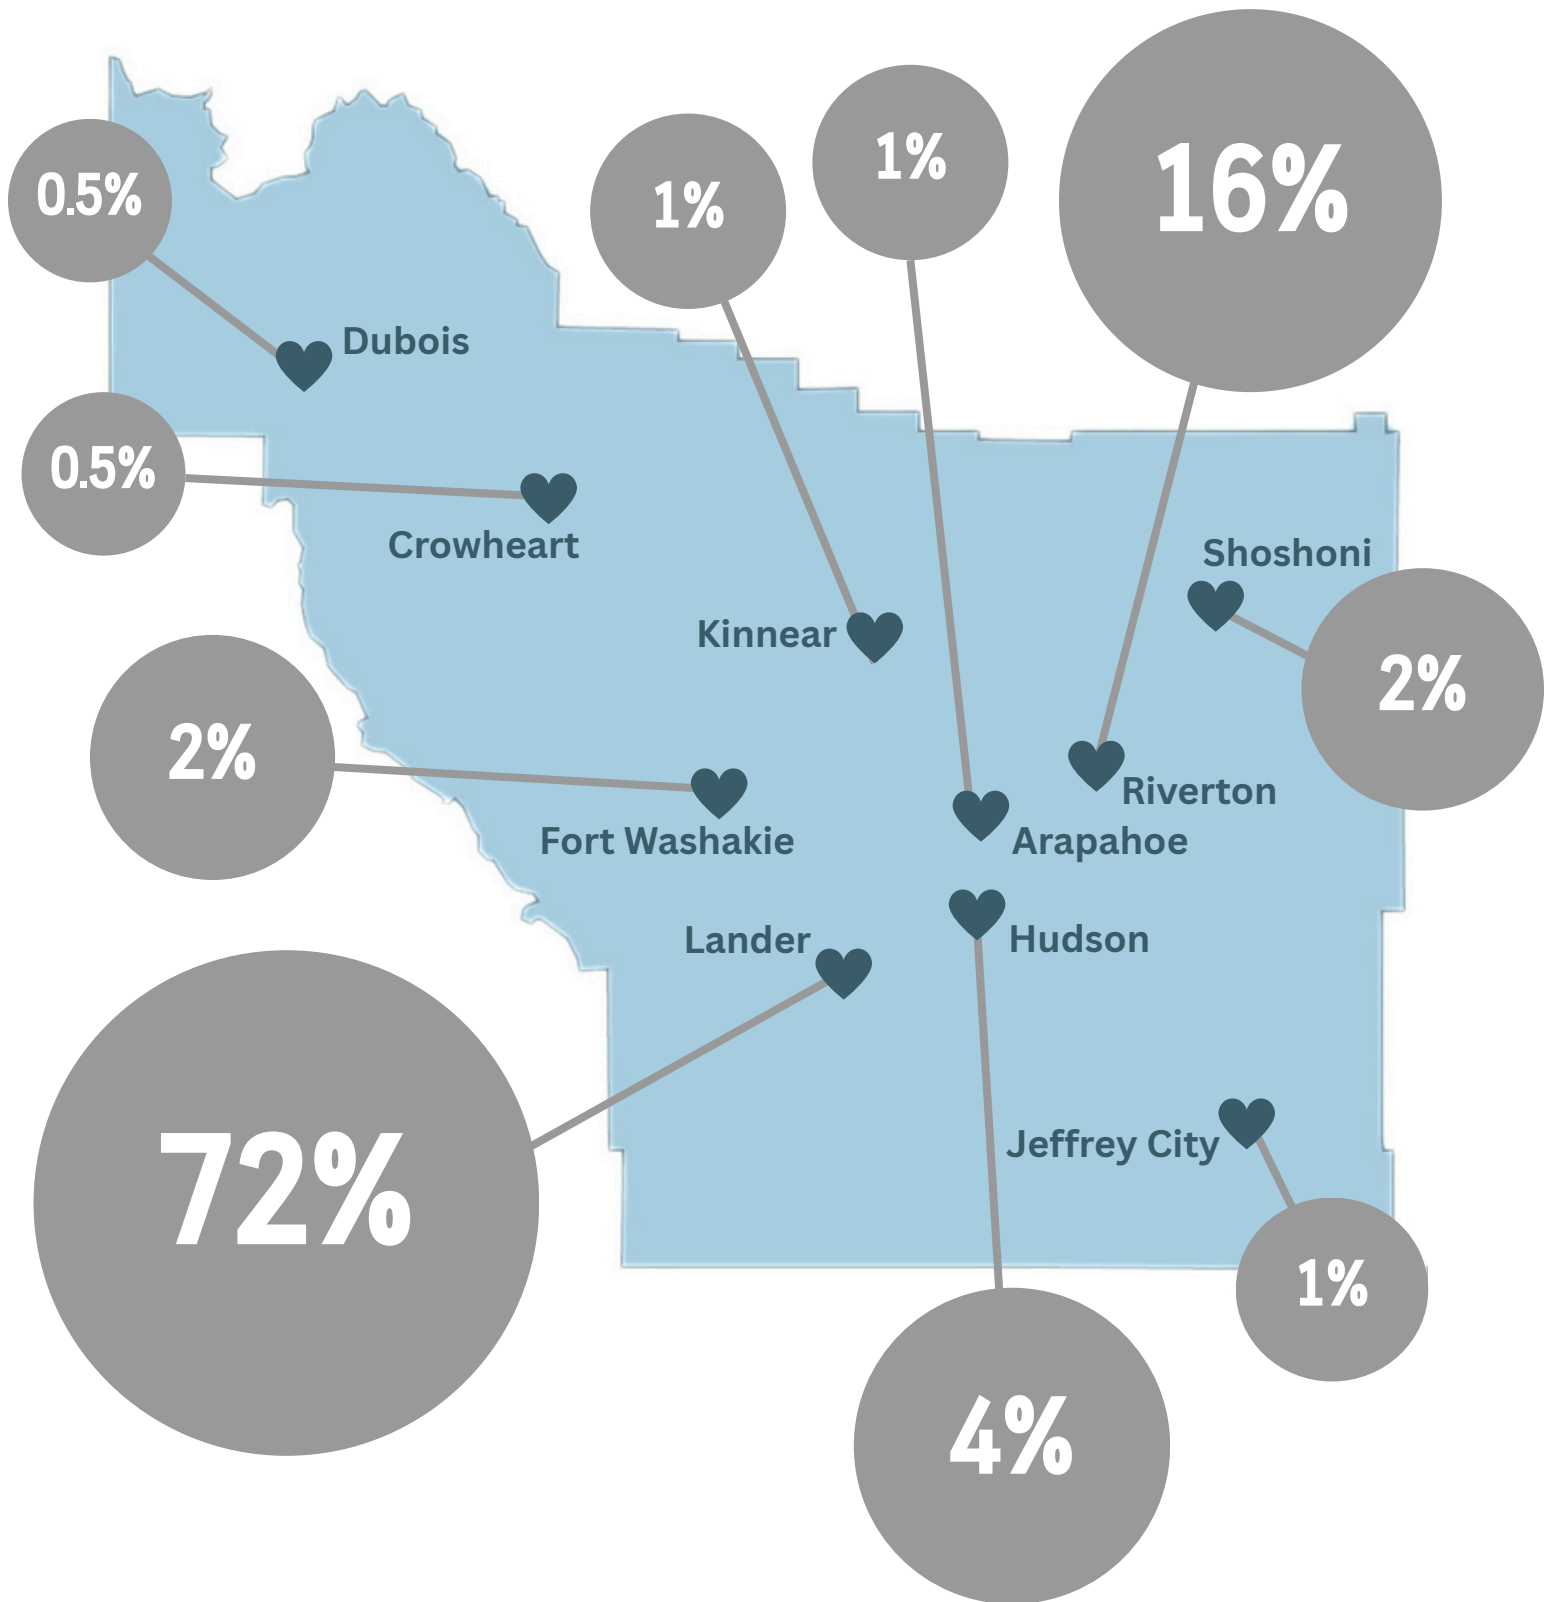

Of the 39,741 people living in Fremont County, 13.5% live below the federal poverty level—that's roughly one in every seven residents. Nearly 20% of county residents under age 65 are uninsured, making access to healthcare a serious challenge¹. For many in our community, this means preventable diseases go unchecked, acute medical needs go unmet, and chronic illnesses go unmanaged. Medical bills pile up unpaid, and the ER becomes the only place people can turn to for care, placing undue stress on already overburdened rural emergency services.

In response to this urgent need, Lander Free Medical Clinic was established to provide free primary healthcare and wraparound services to low-income, uninsured residents of Fremont County. Since opening our doors in February 2023, our staff and team of volunteer providers has served 213 patients from across the county.

TO LANDER... AND BEYOND.

LFMC serves over 200 patients from across Fremont County! Here's a quick breakdown of where our patients live:

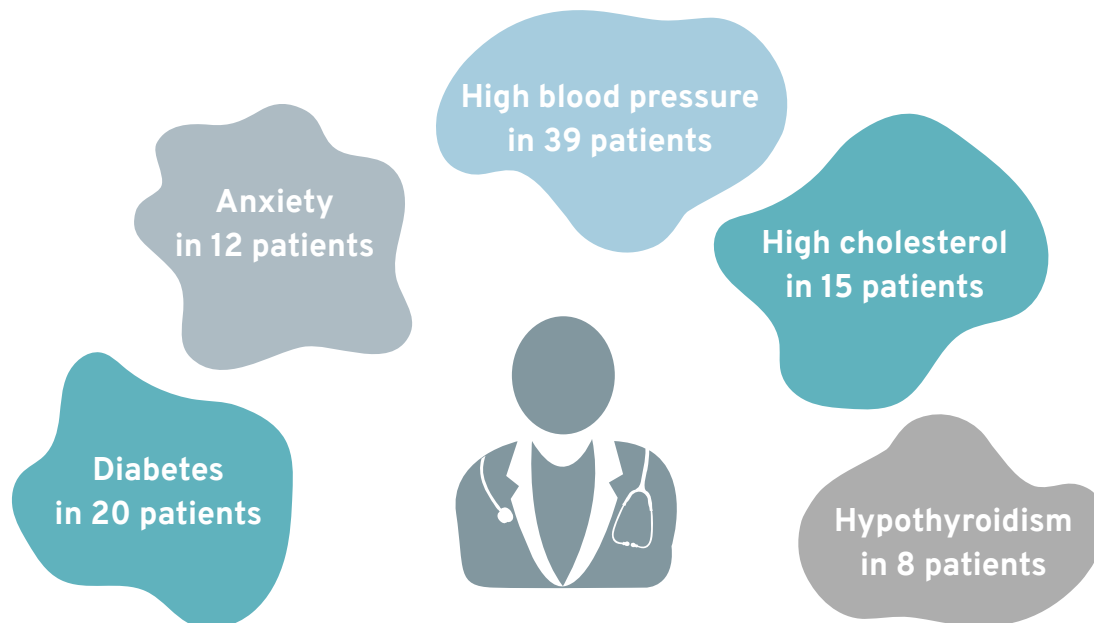

WHAT DOES A HEALTHIER FREMONT COUNTY LOOK LIKE TO YOU?

To us at Lander Free Medical Clinic, it looks like families spending more time together. It looks like less hospital stays, more effective working days, and a community that joins even closer together when we're all feeling better.

This is how we get that done.

DIAGNOSING

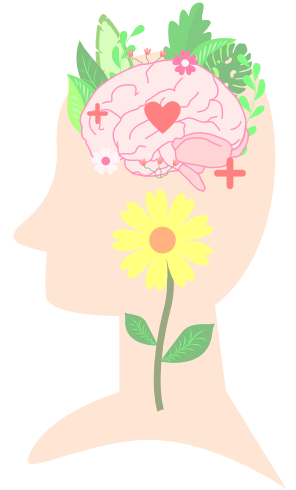

Here's a snapshot of a few common ailments that our volunteer providers have diagnosed and treated in our patients:

What would've happened if these folks hadn't been diagnosed and treated by the clinic? Unfortunately, when our neighbors go without health care due to financial barriers, it's a gamble taken on their life. Untreated high blood pressure can lead to stroke, organ failure and death. Untreated diabetes can result in nerve damage, kidney disease and limb loss.

WHOLE HEALTH APPROACH

Every patient has a different story, and different needs. In order to care for the whole person, each patient completes the AAFP Social Needs Screening tool in-clinic. This highlights needs regarding food, housing, utilities, safety and more. Following a whole health approach, we've prevented a handful of patients from becoming homeless, and have helped several unhoused neighbors obtain housing by partnering with Almost Home and First Stop Help Center. In addition, we've provided over 50 gas cards and over 30 Lander Senior Bus passes to patients that needed assistance making it to specialty appointments, lab draws, and more.

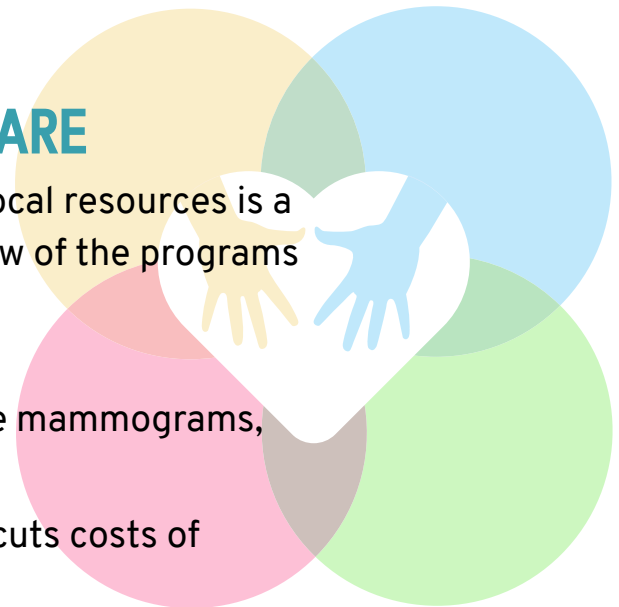

PARTNERS IN PREVENTION & CARE

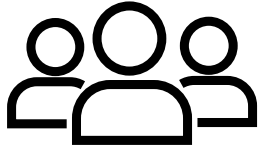

Connecting patients with available state and local resources is a key aspect of our intake process. Here are a few of the programs that we routinely utilize:

- Wyoming Cancer Screening Program - free mammograms, pap smears, & colonoscopies!
- Wyoming Medication Donation Program - cuts costs of expensive chronic medications
- Wyoming Quit Tobacco - for those ready to quit smoking/vaping
- Fremont County Public Health - a great resource for low-cost vaccinations and STI screenings
- SNAP, Lander Care & Share Food Bank, Methodist Food Pantry - for those experiencing food insecurity

Together, we work to keep our neighbors healthy, housed, fed, and secure!

2024 BY THE NUMBERS...

700+

documented patient encounters

\$122,000

in billable visits provided to our patients free of charge

\$117,800

in labs & imaging services provided through our partnerships with Lander Medical Clinic and SageWest **for only \$12,400—a savings of nearly 90%!**

1,400+

volunteer hours

\$32,800

in prescription medications provided, obtained by the clinic for **\$18,250** thanks to our partnerships with local pharmacies, Direct Relief, and AmeriCares

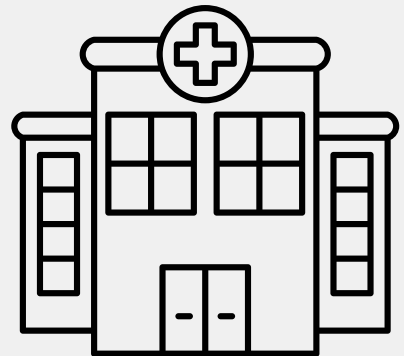

23

community partners who provide discounted or at-cost services for our patients

SURVEY SAYS...

If there had not been available appointments at LFMC:

- 25% of patients say they **would have gone to the emergency room**

- 60% of patients say they would not have gone anywhere for care

“I feel like this is such a great place. The level of care is excellent and I feel like you genuinely care about me and want to help me.”

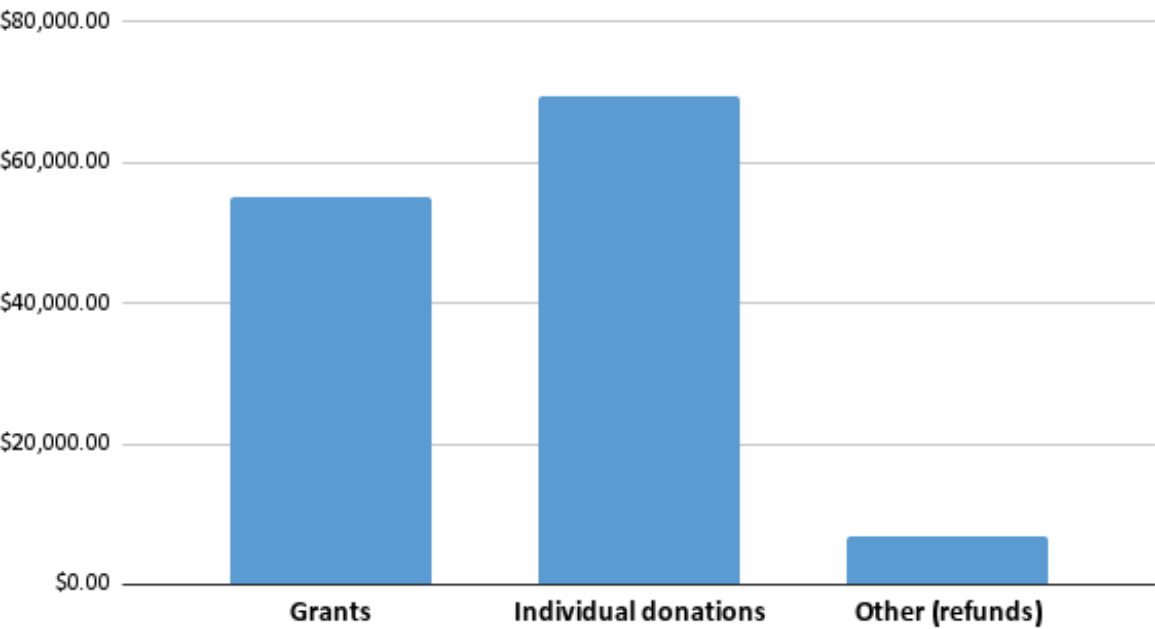

“Always receive excellent care here. Grateful for you all!”

“Never met nicer people. The most caring and awesome. ★★★★★. Thank you so much.”

2024 SUPPORT & EXPENSES OVERVIEW

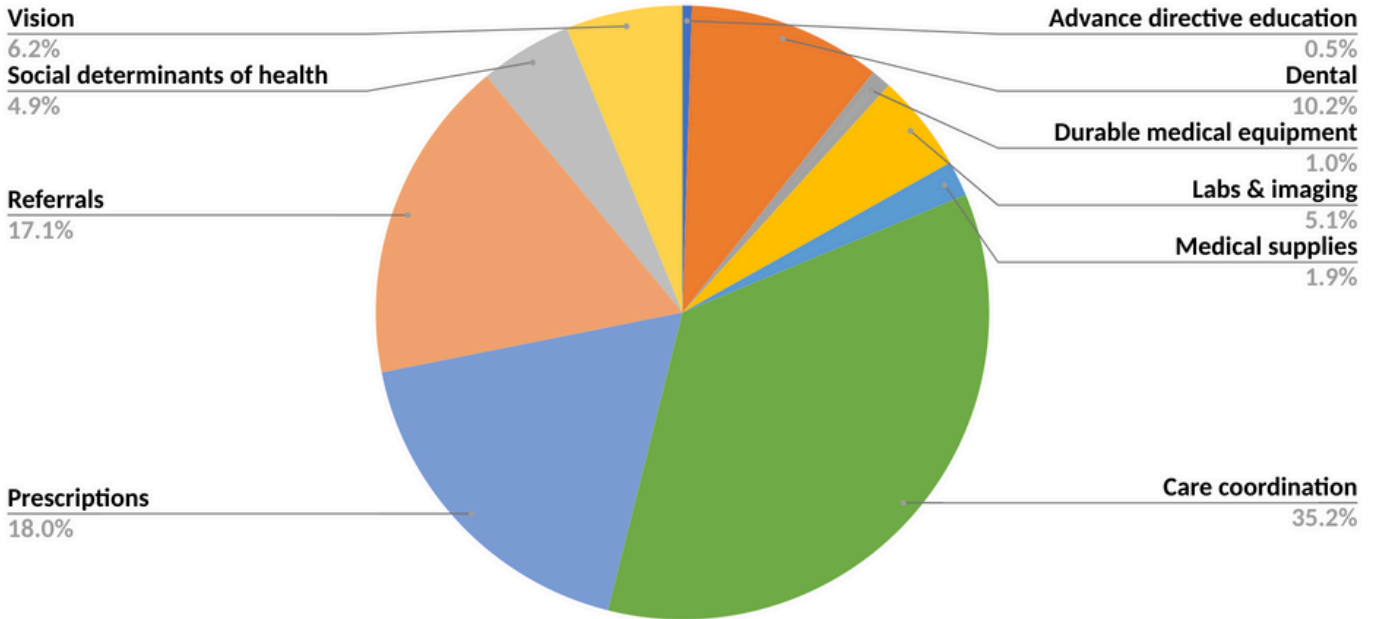

2024 Support Overview

2024 Expenses Overview

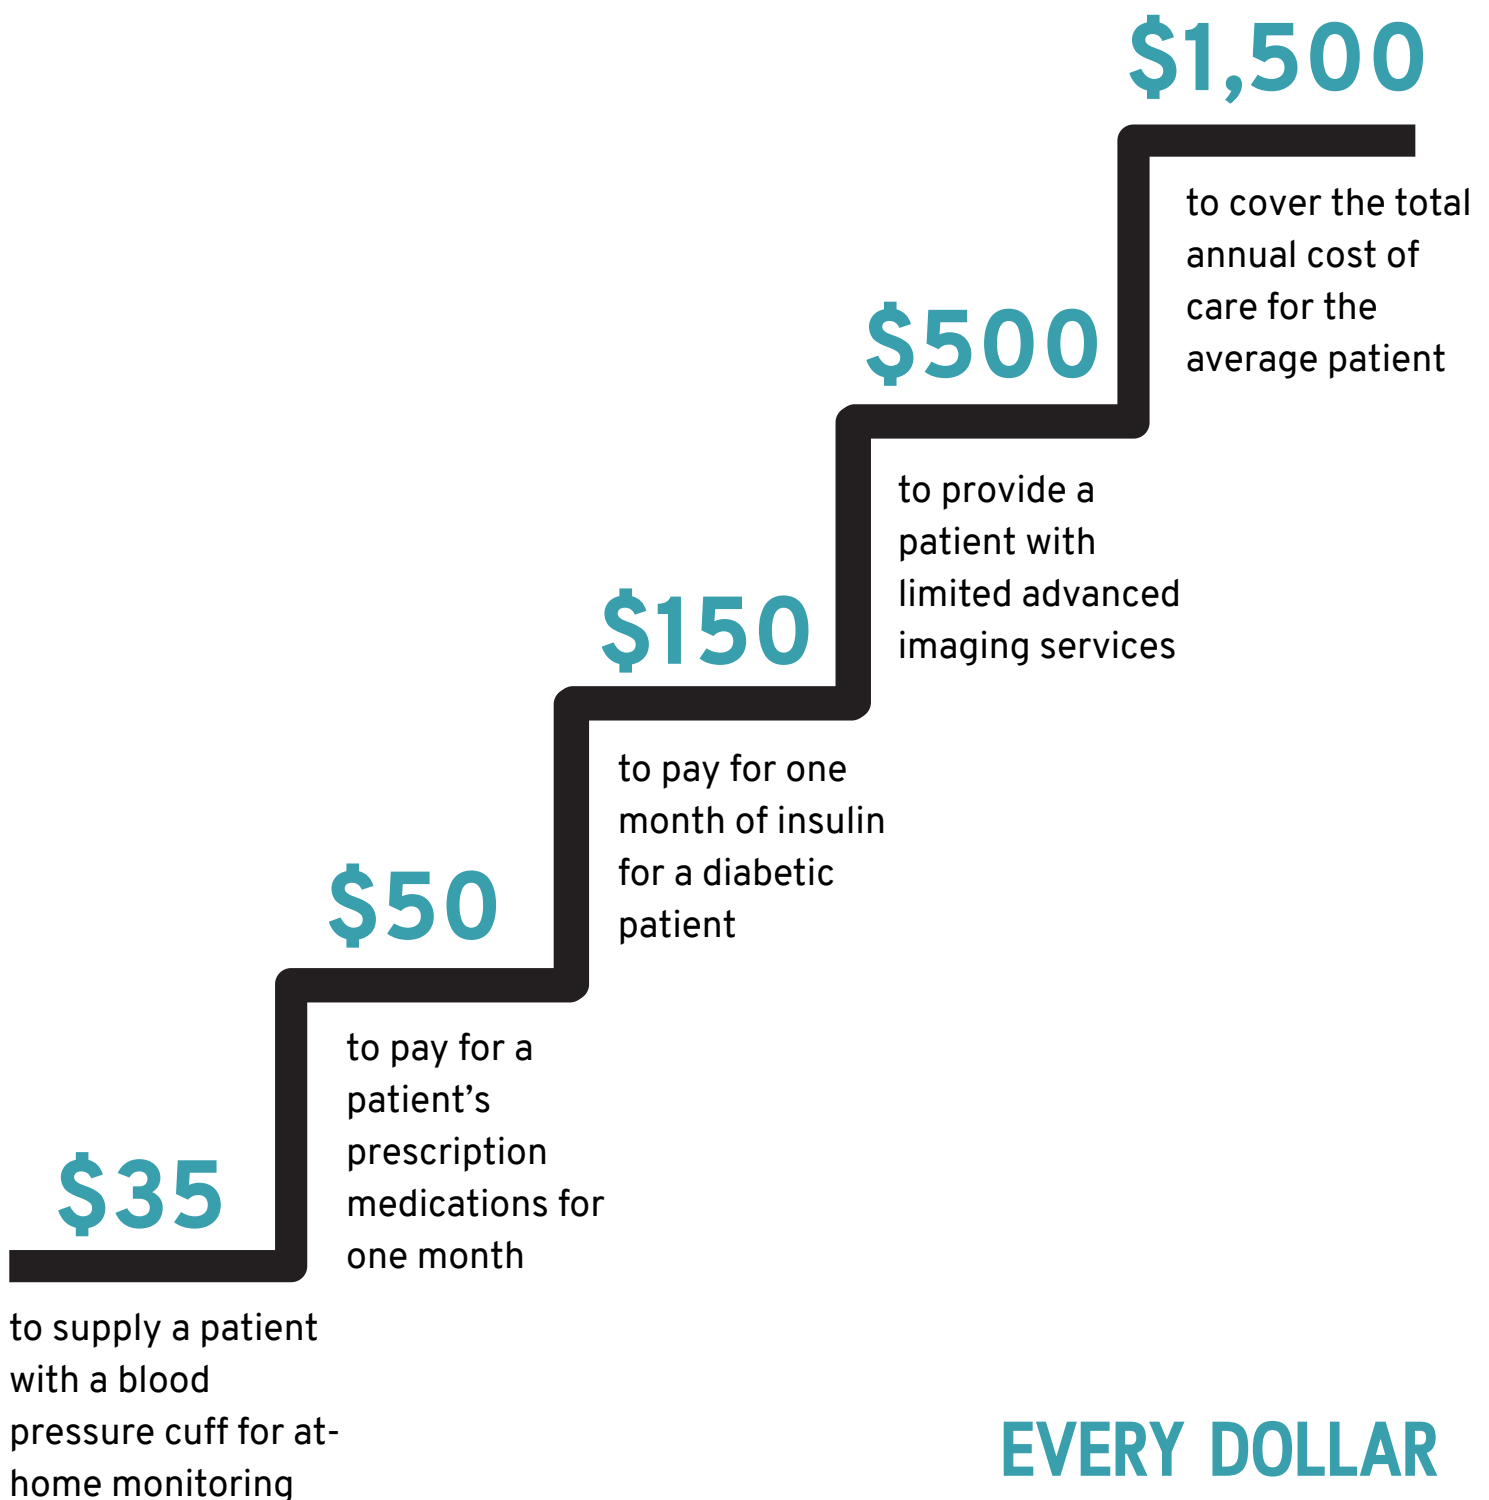

2024 Patient Care Spending

Many clinic costs are cut to \$0 thanks to generous support from our community! Rent and utilities are provided to us free of charge by Trinity Episcopal Church in Lander. Our volunteer providers are also a monumental source of support. Without their contributions, nearly 100% of our budget would have gone to patient visits alone.

Additionally, in partnership with local organizations, costs for labs, imaging, and specialty care provided to our patients are discounted substantially.

Thank you...

To all of our volunteers, donors, and partners: we want to extend our sincerest thanks. You have not only contributed time, money, and expertise in support of our mission, you have contributed hope. Your support helps people get the care they need, allowing them to heal, return to work, spend quality time with their loved ones, and continue to take part in the community that we all call home.
